

Company profile

Our architect's office deals with all kinds of new constructions, renovations and extensions. Many of our commissions come about through our success in architecture competitions or through case studies, and mainly focus on schools, residential and commercial buildings, restaurants and hotels. Our goal is to develop buildings which offer an optimal solution in terms of aesthetics, function and design. We look for contextual connections whilst also fulfilling economic requirements.

selection of projects:

- single family house in Triengen, renovation/extension 1999, good building award Lucerne canton
- school building St. Karl in Altdorf, renovation/extension 2002, Wakkerpreis 2007 to Altdorf
